

THE MOST ADVANCED NAME IN DRAINAGE SYSTEMS

MARK HAYES  
Manager - Manufacturing Programs

To Whom It May Concern:

The following is in response to your request for MSDS for ADS products – specifically HDPE pipe and fittings.

According to 29CFR 1910.1200, C, (i), (ii), (iii), (OSHA's Hazard Communication Standard, Definitions), each ADS product is considered an article.

An Article is defined as a manufactured item:

- i. which is formed to a specific shape or design during manufacture;
- ii. which has end use function(s) depending in whole or in part upon its shape or design during end use;
- iii. and which does not release, or otherwise result in exposure to, a hazardous chemical under normal condition of use.

CFR 1910.1200, B, 6 (iv) states that this standard does not apply to articles. Therefore, Material Safety Data Sheets are not required for ADS Products.

Please feel free to contact me if you have any further questions or concerns.

Sincerely,  
Mark Hayes
